OUR PEOPLE

At TCE, our team utilizes our combined abilities and years of expertise to help our clients achieve their goals. We bring to the table extensive, diversified knowledge of many facets of the construction industry, allowing us to develop strategies to help you improve productivity and profitability while maintaining cost-effectiveness.

OUR APPROACH

We take a proactive, honest, and straightforward approach to every project, with an end goal of customer satisfaction and safe completion. As both project managers and builders, we understand the specific requirements that define each project, and can provide quality installations at very competitive prices.

Based in Hamilton, Ontario, Triple Crown Enterprises ("TCE") has been providing our clients across Southern Ontario and the Greater Toronto Area with premium construction solutions for over 20 years. Our services include civil, structural, electrical installation, general construction works, and custom metal fabrications. Our divisions also regularly act as sub-contractors to other General Contractors.

Since our founding in 1994, we have developed a rock-solid reputation with our client base. We are proud of the work we do and we strive to develop strong working relationships between our teams and our clients. The foundations of our business are built on the time-honoured values of trust, commitment, and excellence.

INDUSTRIES SERVED

- Automotive and Manufacturing
- Food and Pharmaceutical
- Institutional
- Power Generation
- Commercial
- Industrial
- Mining
- Steels and Metals

BENEFITS OF WORKING WITH AN ISO-CERTIFIED COMPANY

- Consistent quality.
- Reliable documentation for activities, actions, issues, and decisions.
- Customer and project communication methodology.
- Consistent structure to project and office record keeping.
- Customer expectations and feedback development and identification.
- Positive mindset for continuous improvement.
- Tracking and awareness of training needs, while providing employees and management opportunities for evaluating training benefits.

TCE, a company committed to delivering high-quality products and services became ISO 9001 certified in 2008. We continue to maintain our ISO certification to current ISO 9001 standards, demonstrating our company-wide dedication to quality, continuous improvement, and superior performance.

As a further demonstration to our commitment to quality, TCE became a COR™ Certified Company in 2018.

Every project, no matter how large, small or complex, is treated with the same commitment to quality. We systematically monitor our quality through client feedback and frequent management reviews. We discuss improvements and potential quality policy adjustments during our annual quality assessment.

BUILDING TRUST, COMMITMENT AND EXCELLENCE SINCE 1994

FULL-SERVICE CONSTRUCTION

However challenging your construction project might be, TCE has the quality control, skills, expertise, and highly experienced personnel to deliver your project on time and on budget.

OUR DIVISIONS

CIVIL CONSTRUCTION

Our civil group specializes in executing complicated foundations and concrete work in challenging environments. We work around operating facilities within difficult time constraints, during outages and shut-downs, and can perform maintenance turnarounds for industrial clients. We also support institutional and commercial projects such as building repairs, retrofits, upgrades, and renovations.

ELECTRICAL

Our electrical team works with you to develop the best installation strategy to avoid the disruption to your production. The ultimate goal of every project is to minimize downtime and reduce overall cost. Whether your project is for a single piece of equipment or an entire production line, we get the job done quickly, efficiently, and intelligently with a commitment to the highest standards of safety.

FABRICATION

Our metal and iron work specialists have extensive experience designing, building, and erecting custom steel fabrications of all sizes and specifications. We work with a wide variety of materials including carbon steel, stainless steel, aluminum, abrasive resistant steel, and more. Entire projects can be completed conveniently in one location in our spacious, 37,000 square foot facility.

CONCEPT-TO-COMPLETION CONSTRUCTION

WHAT WE DO

TCE provides a full range of construction, maintenance, and renovation services for the Industrial, Commercial, and Institutional sectors, for projects of any size.

We self-perform civil, structural, and electrical installation, general construction works, and custom metal fabrication. Our groups can also act as sub-contractors to other General Contractors. Our core management team will work with you to build detailed cost estimates and project schedules, providing an informed approach to a cost-effective plan and ensuring your project is completed to the highest standards. Together, our groups have the ability to turn your plans into action and your concepts into reality.

GENERAL CONTRACTING

As a General Contractor, TCE can provide construction services for clients' supplied drawings and specifications. The collaboration of our Civil, Electrical, and Fabrication divisions limits the need to sub-contract work outside of the company.

SUB-CONTRACTING

TCE's Civil, Electrical, and Fabrication divisions are capable of acting as sub-contractors to other General Contractors. Our years of experience and qualified personnel will help to mitigate risk on large-scale projects.

MAINTENANCE

We act as both project manager and builder for a full range of civil and electrical construction, maintenance, and renovation projects (small and large scale). This includes city, refinery, automotive, and steel facilities.

DESIGN-BUILD

With both build and design-build capabilities, TCE provides our clients with a "one-stop shop" construction solution. Our teams, consisting of construction and engineering professionals, work together to design and construct according to your requirements.

MAIN FACILITY SHUTDOWNS

TCE's project managers collaborate with you to develop the best schedule to suit your needs, working around your production to ensure our construction remains non-disruptive. Our ability to operate during plant outages, shutdowns, and tight time constraints allows us to accommodate difficult project schedules.

WE SPECIALIZE IN COMPLEX CONCRETE WORKS

CIVIL CONSTRUCTION

No project is too complicated for us.
Our teams have extensive experience
executing complex concrete pours
in challenging environments.

Our Civil Construction group has developed a reputation for skillfully executing complicated foundation work. The more complex the pour, the better suited we are. We work around operating facilities within difficult time constraints, during outages and shut-downs, and can perform maintenance turnarounds for industrial clients. We also support Institutional and Commercial projects such as building repairs, retrofits, upgrades, and renovations.

ARCHITECTURAL

Modern architectural advances have demanded an increased complexity in concrete structures. Our Civil team is up to the task — we have the experience and resources to execute technical pours with pinpoint precision.

INDUSTRIAL

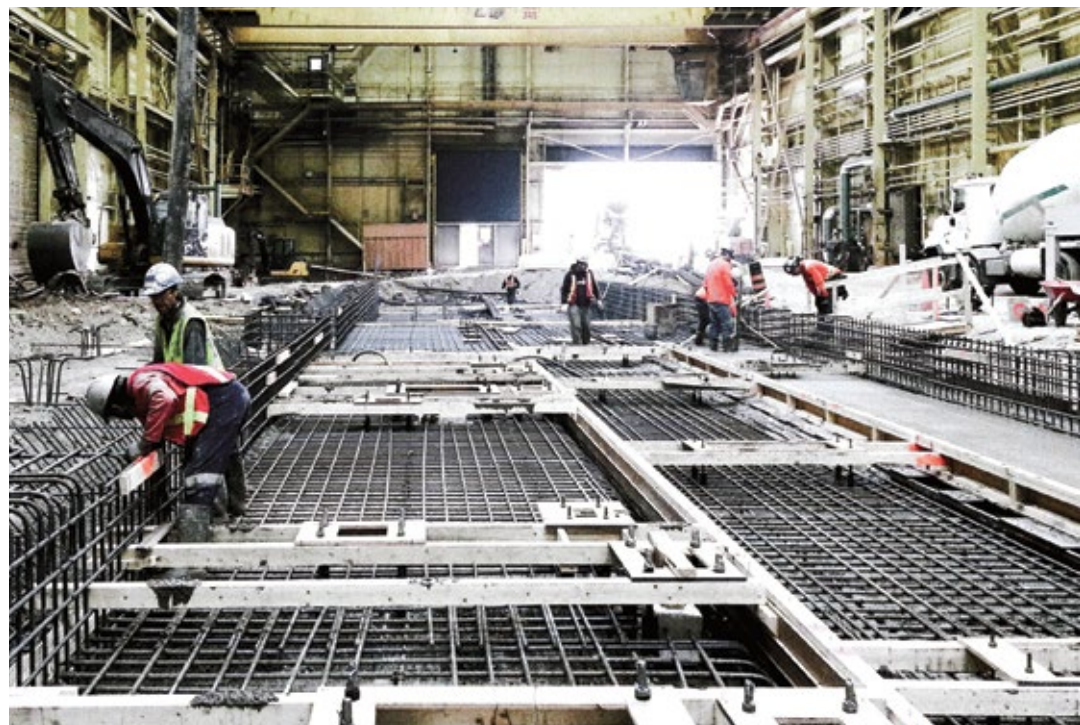

We have successfully completed projects in both heavy and light industrial settings for over 20 years, always taking measures to ensure facility production is not disrupted during construction.

AUTOMOTIVE

Our experience in the automotive industry ranges from facility maintenance and renovations to complicated foundation work.

SCAFFOLDING/SHORING

TCE has the ability to design, install, and supply scaffolding and shoring equipment for contracted and subcontracted projects.

WORKING WITH YOU TO UPGRADE YOUR BUSINESS

ELECTRICAL

Our experienced team of professionals will provide you with the necessary services to successfully complete your next electrical project.

From design to completion, we demonstrate our professionalism through honest service, strict standards, and strong work ethic. Our design team provides efficient and cost-saving designs, and ensures electrical plans meet all of your needs and requirements. Our installation team, consisting of licensed electricians from the International Brotherhood of Electrical Workers (IBEW), works hard to outperform your expectations.

COMMERCIAL AND INDUSTRIAL CONTRACTING

Almost all construction projects require electrical systems. From Medium voltage power feeds for transformers to low voltage network cabling to LED lighting, electricity plays a vital role. The concepts are often complex and have an effect on all trades. TCE electrical has garnered a reputation as being a solid partner with clients, fellow trades and General Contractors. With a straightforward approach and strong communications, TCE electrical has delivered countless successful results.

SAFETY

TCE is licensed through the Electrical Contractor Registration Agency. We only employ qualified union electricians who are up-to-date on the latest safety information. Having the right people for the job saves our clients money on call-backs and improves electrical safety.

Electrical contracting can be complex and dangerous. At TCE, you can count on our Electrical team to maintain clarity and implement safe work practices through all of your projects. We work closely with you from the outset of every project through to completion to ensure your project remains on schedule and on budget.

FORGING YOUR CONCEPTS INTO REALITY

CUSTOM STEEL FABRICATION

TCE's metal and iron work specialists have extensive experience designing, building, and erecting custom steel fabrications of all sizes and specifications.

From concept and engineering through to installation, TCE has the skills and resources to provide complete design solutions for all of your fabrication requirements. Our team of professionals, including CWB certified welders, experienced construction crews, Professional Engineers, QA/QC personnel and project managers, can offer design-build construction services for a wide range of projects.

Our design-build specialists work closely with you to ensure all of your equipment needs are met. Clients have the opportunity to test and evaluate the equipment designs at our large fabrication facility in Hamilton, Ontario prior to installation.

From all manner of custom steel fabricated structures to stairs, railings, metal buildings, mezzanines, platforms, and safety guarding, no job is out of our comfort zone.

We have 37,000 square feet available in our spacious, ISO 9001 certified fabrication facility to accommodate your project, no matter how large or small.

MATERIALS

TCE has over 20 years of experience working with a wide variety of materials including carbon steel, stainless steel, aluminum, abrasive resistant steel, and more.

EQUIPMENT

Our fabrication facility is equipped with machines to cut, burn, form, machine, weld, assemble, and paint, enabling our team to complete entire projects in a single location.

PAINT BOOTH

We have a full-service paint booth, located within our fabrication facility, that enables us to paint a wide range of materials in-house with a variety of finishes.

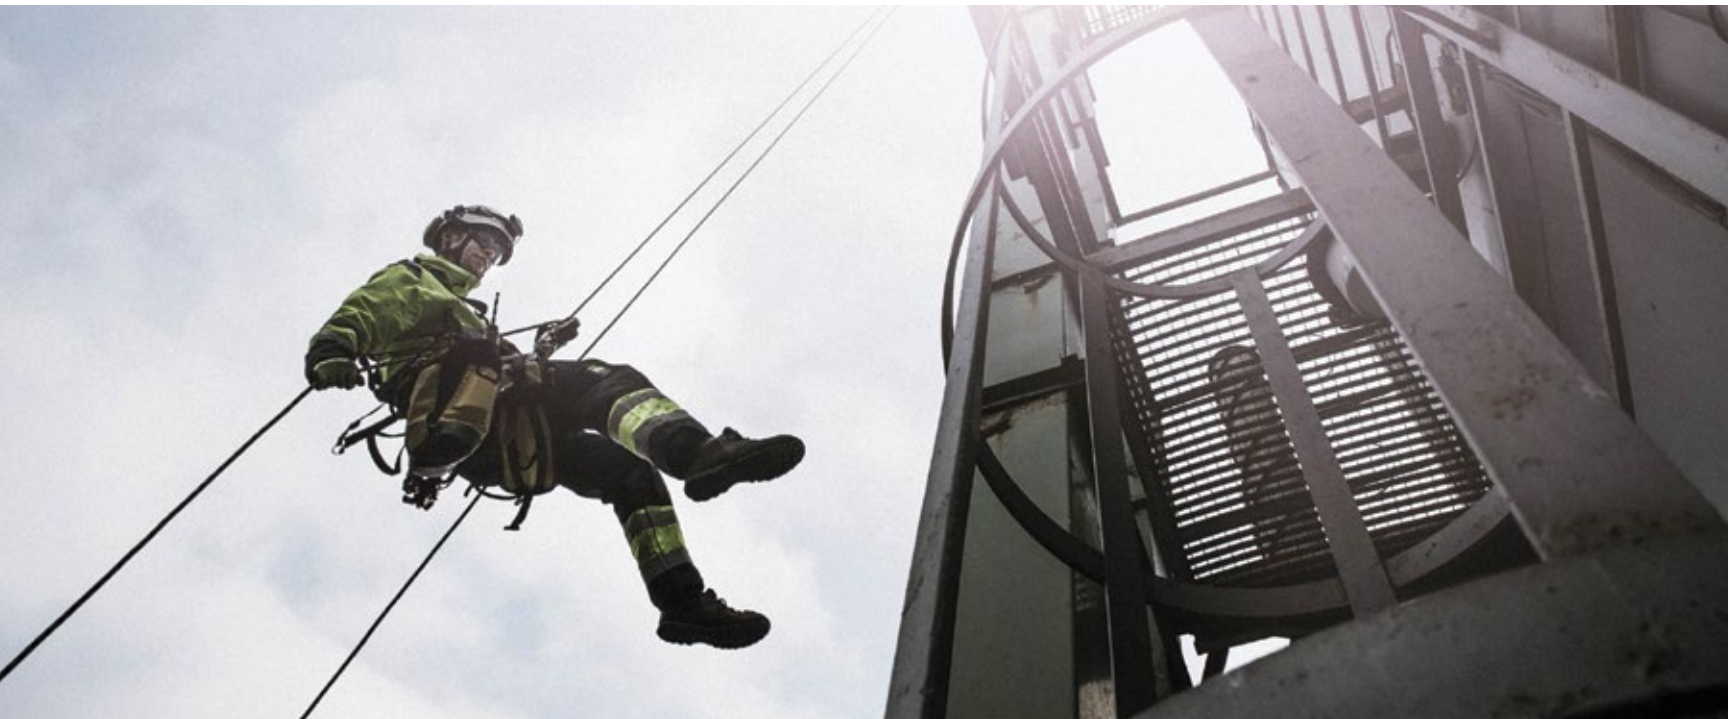

CWB CERTIFIED

We are up-to-date with the latest approved welding procedures. With our CWB certification, you can be assured that our welders are bound to the highest standards of quality and safety.

SAFETY FIRST. SAFETY ALWAYS.

HEALTH AND SAFETY

Health and Safety is the responsibility of every employee, habitual in our daily activities, and held to the highest standards. It is of the utmost importance to our personnel and our clients.

Our licensed, in-house safety division puts safety at the forefront of every aspect of our business. TCE does not compromise when it comes to safety. Our workers are fully trained and qualified to perform their duties, and have a fundamental understanding that the safe way is not only the best way, it is the only way.

TCE has a full-time Environment, Health and Safety management team. This team designs, implements and monitors our company safety program.

Our employees are equipped with the appropriate safety systems and receive continuous training. Managers and employees are encouraged to contribute ideas that will further improve our Environment, Health and Safety Standards. Our Safety Program includes "The Seven Safety at Work Principles".

TCE's project activities are ecologically sustainable with minimal impact on the natural environment. We manage waste by following the best practices of the "5 R's": Rethink, Refuse, Reduce, Reuse and Recycle. Recycling programs are in effect at all TCE locations and project sites wherever possible. We endeavour to offer our clients environmentally friendly alternatives for their projects and prefer to buy products that will prevent hazardous waste.
